* The changes in the first year program are reflected by the addition of an unrestricted elective in the first semester and spreading out the Science GIRs.

* If a 21W CI-HW is taken in the first semester, an unrestricted elective can be swapped in for a 21W elective later on.

* One of the unrestricted electives in the Fall of Year 4 can be 6 units (bringing the total units beyond the GIR to the required 180. The current charts have students finishing with 186 units beyond).
